

## A METHOD AND APPARATUS FOR DISCLOSING PROFILE INFORMATION TO A READER

## Abstract of the Disclosure

A document delivery system that provides first content and second content to a reader over a network, such as the Internet. The delivery system selects content for the reader based upon profile information. The profile information may relate to any one or more of the first content, the second content, and the reader. In addition to providing the first and second content to the reader, the delivery system also provides at least the profile information used to select the first content and second content for delivery to the reader.
